

DAMAGED SCREW REMOVER
X-OUT™
Damaged Screw Remover

NEW

**For removing damaged screws
Fast AND Easy**

The reusable X-OUT™ is designed to be used in a variable speed handdrill set for reverse. It can be chucked directly into the drill or held using a 1/4 inch hex bit holder. If a hand drill is not handy, X-OUT™ can also be used in a hex bit screwdriver. In both applications you push down and turn. It is as simple and quick as a normal screwdriver. X-OUT™ removes all screws that have an indented drive fit. This includes such fasteners as Phillips, Slotted, Hex, Torx, Tri-Wing, Pozidriv, Frearson, most Tamper Resistant screws and many more.

**Long Life
Reusable
Warranty
No Drilling**
